

破碎斗

CRUSHER BUCKET

适用范围

scope of application

* 破碎斗广泛用于矿山，采石场，基建的物料粉碎工作；
可粉碎物料：建筑垃圾，沥青，各类矿石，大理石，花岗岩，河卵石等

* Crusher bucket is widely used in material crushing in mines, quarries and infrastructure. It can crush materials: construction waste, asphalt, various ores, marble, granite, river pebbles, etc.

主要特点

Main Feature

- 01** 壳体90%采用高强度耐磨板制成，挖斗前铲板采用悍达耐磨板，双侧25毫米加厚设计。
90% of the shell is made of high-strength wear-resistant plate, and the front shovel plate of the bucket is made of Hardox wear-resistant plate, with a double-sided 25mm thickening design.
- 02** 采用意大利原装进口马达，工作稳定高效。
Adopting the motor imported from Italy, it works stably and efficiently.
- 03** 独特的飞轮设计替代传统的皮带传动，节省维护费用。
The unique flywheel design replaces the traditional belt drive, saving maintenance costs.
- 04** 粉碎鄂板采用进口悍达耐磨板，经久耐用。
The crushing jaw plate is made of imported Hardox wear-resistant plate, which is durable.
- 05** 出料口范围15-120mm 可调。
Discharge port range 15-120mm adjustable.

破碎斗参数 PARAMETER

型号 Model	单位 Unit	BYBC155	BYBC225B	BYBC300
重量 Weight	Kg	2250	3300	3800
进料孔 Feed Hole	Mm	600*500	740*500	900*550
排料孔 Discharge Hole	Mm	15/120	15/120	15/120
装载量 Load Volume	L	0.58	0.7	0.85
额定压力 Pressure	Bar	200	200	200
油流量 Oil Flow	L/min	130	150	180
适配挖机吨位 Hydraulic excavator	T	13-18	19-30	31-39
